

ADVANCED POWER  
TECHNOLOGIES

# Power Systems Solutions

• Pre-engineered MicroGrids  
• Intelligent Generator and Distribution Switchgear  
• PLC control, Annunciation and Relay panels  
• Motor Control panels  
• Uninterruptible Power and Motor ride-through Systems

# FEATURED PRODUCTS

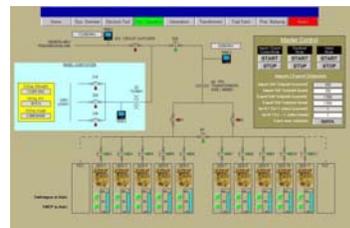

Engineered, factory built power systems. Genset, switchgear and control housing.

Service entrance automatic source transfer switchboards.

Outdoor walk-in Medium and Low Voltage Switchgear with insulated aisle.

Supervisory Control and Data Acquisition (SCADA) systems. Remote equipment monitoring.

Mobile Emergency Generator Quick Connect Switchboard.

PLC based Control Panels. Generator Paralleling, Load Transfer and Main-Tie-Main Control Panels. Custom Relay Panels.

Equipment and Process Control Panels.

Low and Medium voltage Motor Control Systems. Variable Speed Drive and Power loss Ride-Through Systems.

Intelligent Generator Paralleling and Distribution Switchgear and Switchboards.

Custom designed Smart MicroGrids for Ultimate Energy Efficiency, Reliability and Power Quality.
